1. Introduction

This document contains technical specification that provides the information necessary for software developers/engineers who intend to integrate ScoreMe APIs in any software application that would like to consume the API Gateway services.

This document describes the APIs exposed by ScoreMe Gateway and contains API endpoints with sample request data payload and sample response of API.

1.1 Pre-requisites

The REST APIs mentioned in this document use JSON notation for data exchange over HTTP.

Knowledge in above mentioned technical area is required before proceeding to rest of the document.

2. Resources & Formats

User of API services should have access to the system before proceeding to the rest of the document. Please contact your system administrator for getting user access.

2.1 URLs

API services use the following URL and associated parameters:

Table 1- URLs

Environment/ Module	Parameter	Value
Production	{BASE_URL}	https://sm-gst.scoreme.in/
Sandbox	{BASE_URL}	https://sm-gst-sandbox.scoreme.in/

2.2 Response JSON Format

All ScoreMe APIs return data as per following JSON object format.

```
{
  "data": { "<key1>": "<value1>",
  .....
  .....
  "<keyN>": "<valueN>"
},
  "responseMessage": "<response message>",
  "responseCode": "<response code>"
}
```

Table 2- JSON Format for APIs

Parameter	Description
Data	JSON string of the data retrieved against an API.
resp_code	Returned response code from server.
resp_msg	Returned message string.

2.3 Date Time Format

Date/Time: All date times have to be passed in IST time zone in format "YYYY-MM-DD HH:MM:SS"

For example:

2021 August 18 11:34:56 PM = 2020-08-18 23:34:56

2021 August 20th 3:29:10 AM = 2021-Aug-20 03:29:10

3. Authentication & Authorization

3.1 Authentication: User Identity

User access is provided to bank/institution authorized personnel only. Please contact your administrator to get your access created in the system. Your email id would be your username for using API services.

3.2 Authorization: User Privileges

Please contact your administrator to get your access enabled for usage of API services.

3.3 Essential Header Parameters

All APIs take the information below in the header part of http request.

Key	Value
ClientId	"<client id>"
ClientSecret	"<client Secret>"
Sample ClientId	XXXXXXXXXXXXXXXXXXXXXXXXXXXX
Sample ClientSecret	XXXXXXXXXXXXXXXXXXXXXXXXXXXX XXXXXXXXXXXXXXXXXXXX

Note:

The values for clientId and clientSecret would be different for production and sandbox environments. Please contact your administrator to get correct values for clientId and clientSecret for the environment you are using.

5. Validations for Payload

This section details the validations for each GST API that have been put in the system for the payload.

5.1 GSTIN Basic Details

a. File

- File should be in .xlsx format
- It should contain list of PAN number for the bulk data upload in column A.

b. PAN Number

- PAN should be 10 Digits and should be alpha numeric in the correct PAN card format.
- No special characters allowed.
- It is case sensitive.

6. Webhooks

Webhooks are used to get the data/response automatically once it gets generated at the server. For this we would need an open URL of your application, for which our system will initiate the call to push message that POST request is complete.

System will make a POST request with following headers:

Key	Value
Content- Type	application/json
Access- Type	application/json
Sample Response	<pre>{ "data": { "jsonUrl": "https://sm-gst- sandbox.scoreme.in/gst/external/reportdownload?file=Reports/ac24 53f8-2413-4585-8dc7-ce90cfa78f2f_GstReport.json", "excelUrl": "https://sm-gst- sandbox.scoreme.in/gst/external/reportdownload?file=Reports/ac24 53f8-2413-4585-8dc7-ce90cfa78f2f_GstReport.xlsx", "referenceId": "ac2453f8-2413-4585-8dc7-ce90cfa78f2f" }, "responseMessage": "Successfully Completed.", "responseCode": "SRC001" }</pre>

7. Troubleshooting & Support

7.1 Error Codes

The error messages are returned by the respective APIs. In case there are any system related errors like crash or network issues, then please refer to HTTP errors at <https://www.w3.org/Protocols/HTTP/HTRESP.html>. Still if the error persists then take a screen shot and note down the sequence of steps taken just before the error occurred and share the same with the helpdesk/support team.

7.2 Special Considerations

In case of any system or application failure, please do not try to fix the problem by yourself. Please do not delete any data from the system and reach out to support team immediately.
